

Release N° CDL0047

For immediate release: 31 May 2005

Enhance your Productivity with the i-mate™ PDA2

New device features integrated Wi-Fi and fastest processor available today.

31 May, 2005 Dubai, UAE - i-mate™, the specialists in Microsoft® Windows Mobile™ devices, proudly add the i-mate™ PDA2 to their range of market leading Pocket PC phones. The i-mate™ PDA2 tri-band GSM/GPRS incorporates one of the fastest PDA processors available at 520 MHz and has 128 MB RAM. This device is tuned for heavy data processing, and thanks to the integrated Wi-Fi, over-the-air synchronization couldn't be simpler.

"The i-mate™ PDA2 is one of the most powerful and expandable mobile devices on the market. The efficiency gains to be had could mean the device pays for itself in no time" said Jim Morrison, Founder and Chief Executive of i-mate™. "Over and above the advanced features of the device itself, the real difference is in the i-mate™ value added services we offer and global warranty play a key role in i-mate™'s strategy to deliver the ultimate mobile experience." The elite web portal, www.clubimate.com, provides all i-mate™ device owners 24/7 technical advice, support and value added services such as free hosted Microsoft® Exchange e-mail, exclusive i-mate™ interactive games and upgrade patches for download. "Club i-mate™ is our virtual community dedicated to helping customers get the most from their devices."

i-mate™ customers will soon enjoy the benefits of anti-virus protection and data-encrypted mobile security through our pioneering partnerships with world leading service providers. Also, all i-mate™ Pocket PC devices come preloaded with Skype™ * (VoIP) which makes reduced calling costs a reality.

All i-mate™ devices run on the Microsoft® Windows Mobile™ Operating System. The bright 3.5" QVGA Transflective touch screen of the i-mate™ PDA2, with screen view rotation function, is excellent for extra-wide viewing space. Users can access and edit Microsoft® Office Word and Excel documents, manage emails on the move, and also view and navigate PDF files. The built in Wi-Fi, Bluetooth connectivity and Skype™ * (VoIP calling) makes the i-mate™ PDA2 one of the most versatile Pocket PC Phones available today. In addition, the i-mate™ PDA2 is compatible with the accessories of its predecessor, the i-mate™ Pocket PC.

It's not all just about business, with the built in Windows Media Player® 10 users can relax and enjoy music or video anywhere; and the 1.3 mega-pixel digital still and video camera ensures you can capture any moment to share with friends and family.

"An outstanding feature of the i-mate™ PDA2 is its ability to be customized with innovative business applications to deliver remote access to a company's core systems in real-time," commented Mr Morrison. "Our devices are highly scalable and can be configured to match the needs of a wide variety of industry applications like field and sales force automation, and asset management."

The i-mate™ PDA2 will be available online and in stores from the beginning of June 2005.

** Not available in all countries.*
